EDUCATION

University of Washington

Master of Science in Data Science

Seattle, WA
Sept 2025 - Mar 2027

SRM Institute of Science and Technology

B.Tech in Computer Science Engineering with specialization in Big Data Analytics (GPA - 3.82/4)

Chennai, TN
May 2019 - Jun 2023

WORK EXPERIENCE

Graduate Research Assistant (P.I. - Prof. Zaid Harchaoui)

Paul G. Allen School of Computer Science, University of Washington

Sept 2025 - Present
Seattle, WA

- Engineered and fine-tuned modular **LoRA adapters** on GPT-4-distilled DiSC dataset to remix authorial styles across 16+ linguistic dimensions for **interpretable authorship obfuscation**.
- Achieved **40% reduction in attribution accuracy** on AuthorMix (30K texts, 14 authors) while **preserving 85% content fidelity** and fluency, outperforming larger LLM baselines at lower compute.

Applied Scientist 2

JPMorgan Chase & Co.

Jun 2023 - Aug 2025
Hyderabad, TS

- Led **fraud detection** initiatives saving over **\$220M annually** by developing high-recall classifiers using **XGBoost** and **CatBoost**; leveraged **multi-objective optimization** to preserve feature interpretability for business partners.
- Deployed Semi-Supervised Graph Neural Networks on 60M+ transaction nodes; introduced **topology-aware edge sampling** and **dynamic neighborhood aggregation**, boosting **fraud-detection precision** by **9.2%** over 2M trans/day.
- Designed and productionized a CLIP-style **Contrastive Pre-Trained Transformer** (ViT encoder & BERT-style decoder) for **Document OCR** to detect Check fraud, processing 500K+ checks daily with a **19% boost** in field-level text accuracy.
- Built **Learning-to-Rank** entity matching system for **KYC** using Pairwise Ranking loss to alert fraud entities; Outperformed the TF-IDF baseline on 3B+ records, cutting **62% false positives** and saving **700+** manual review hours daily.
- Developed **data pipelines** for high-volume transactions in PySpark. Performed **optimal feature selection** using **Decision Trees** that boosted **Fraud Capture rate** by **14%** and enhanced predictive accuracy for risk scoring models.

Research Intern

McGill University - [Mitacs Scholar](#)

Jun 2022 - Sept 2022
Montreal, QC

- Developed **RoBERTa-based sentence embeddings** on AAC image captions to capture word-context. Achieved [Krippendorff's](#) alpha reliability score of **0.82** for context-aware vocab retrieval; deployed the model in [ClickAAC](#) mobile application.

Machine Learning Engineer - Intern

Samsung Research

Jan 2022 - Jun 2022
Bangalore, KN

- Optimized **word-context relationships** for Bixby search using bipartite graphs, reducing **false-positive** preds by **12%**. Matched **FP32** perf for INT8 inference using quantization-aware training for word-disambiguation task with **2.9%** F1 gain.

PROJECTS

Auto-Explainability and Evaluation of LLMs Developed a framework for Transformer Explainability by visualizing prediction attributions using Integrated Gradients in TensorFlow. Integrated with MLFlow Evaluation API for auto-evaluation.

PUBLICATIONS

- [Srivastava, H.](#) (2023). Multi-Modal Sentiment Analysis Using Text and Audio for Customer Support Centers
- [Srivastava, H.](#) (2023). Neural Text Style Transfer with Custom Language Styles for Personalized Communication Systems
- [Srivastava, H.](#) (2021). Using NLP Techniques for Enhancing Augmentative and Alternative Communication Applications

ACCOMPLISHMENTS

- Certifications** — AWS Certified Cloud Practitioner, AWS Certified Machine Learning Specialist
- 1st Position** — JPMC ScaleUp (2024), JPMC AWS DeepRacer Regionals (2023), Smart India Hackathon Nationals (2023)

SKILLS

AI/Research	Machine Learning, NLP, Sequence Modeling, Statistical Modeling, Probabilistic Reasoning, Data Analysis, Semi-Supervised Learning, Graph-ML, Transformers, Ranking, xAI
CS/Tooling	C++, Python, SQL, PyTorch, TensorFlow, Caffe, Sklearn, Spark, Kafka, W&B, HuggingFace, Optuna, Git
Infra/MLOps	AWS, Docker, Kubernetes, Flask, MLFlow, NVIDIA Triton, Feature Stores, Data Version Control, Jenkins
